Adequate Training

Employees are adequately trained if they have a sound knowledge of aspects of TDG that relate directly to their duties. These aspects are set out in [Section 6.2](#) of the TDG Regulations.

It is up to employers to determine what constitutes adequate training for each of their employees.

The type of employee training is not addressed in the TDG Regulations but may involve a combination of classroom instruction, job training, and work experience. For a list of organizations that offer TDG training, please visit: <http://wwwapps.tc.gc.ca/saf-sec-sur/3/train-form/search-eng.aspx>.
